Net Schedule Changes Effective March 1st, 2024

John Jacob Schmidt — February 29, 2024

This net schedule policy supersedes previous 2024 Net changes, dated 18 December 2023.

As the SOI Version 5.0 peer review wraps up, some necessary changes have been identified. These changes particularly affect the National Rolling Regional HF Practice nets on the 1st and 3rd weeks of the month. This cycle begins on the first Tuesday of each month.

TUES: National Nets

19:00 ZULU 20m VOICE

20:00 ZULU 20m DIGITAL @ 900 on the waterfall, Contestia 4/250

TUES: Rolling Regional HF Digital Nets

20:00 (8pm) LOCAL TIME @ 900 on the waterfall, Contestia 4/250

- 80m Winter (during standard time) w/ NCS option to QSY to alt band due to band conditions
- 40m Summer (during Daylight Savings Time) w/ NCS option to QSY to alt band due to band conditions

THURS: Rolling Regional HF Voice Nets

20:00 (8pm) LOCAL TIME

- 80m Winter (during standard time) w/ NCS option to QSY to alt band due to band conditions
- 40m Summer (during Daylight Savings Time) w/ NCS option to QSY to alt band due to band conditions

---

The weekly AIB (AmRRON Intelligence Brief) will continue to be transmitted every Monday:

20:00Z on 20m @ 900 on the waterfall

20:30Z on 40m @ 900 on the waterfall

Other regional, sub-regional, Training, and other nets scheduled as per the principle NCS.

During an activation of the SOI, Rolling Regional Nets will take place on 80m, regardless of time of year, and will follow Zulu time.

If at any time a sudden grid/comms-down event occurs, any special instructions, including upcoming net schedules, will also be disseminated and relayed over radio on the Persistent Presence Net. So there’s no reason why someone wouldn’t be able to find the nets in relatively short order

National Net Schedule, beginning in March…

REMINDER: Turn off ‘TX’ in JS8Call, and do not manually transmit SNR requests during scheduled nets or AIB transmit times.
